

Proactive Lube manager Inc. Makes History!

Here we are, in the New Year, 2025! We are proud to announce being the first company in Canada to offer white Oil Safe™ lids. This is a game changer. Not only does it add one more colour to the Oil Safe™ spectrum, but it also offers an entire range of identification possibilities. Proactive lube manager has been using the Oil Safe™ system for 25 years, being one of the first distributors in Canada.

Oh Ya, Happy 25th anniversary to us!

With the development of our Filtered drum dispensers and the idea of filling the containers without opening the lid, we are the only company in North America that up-fit Oil Safe™ lids with quick couplers and air breathers to control contamination in your top up containers. ISO B couplers are most common. We use Donaldson T.R.A.P™ breathers on all our lids and hand pumps. 3 micron particulate + moisture and are self regenerating.

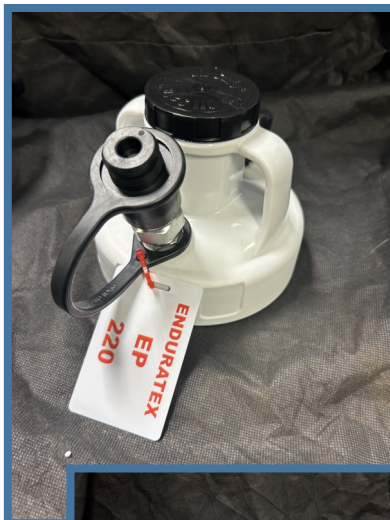

Identification is crucial in the lubrication world! By creating a colour code for each lubricant in use, you are ensuring that there is no cross contamination of lubricants. Some clients use a specific colour for a group of oils with the same additive package but with various viscosities. Other clients only use a few products of various viscosities and different additives and can get away with limited colours.

Since we have been custom printing tags and labels for our clients for a quarter century, we have been a leader in lubricant identification. Multiple colours of tags, labels and font that are available make the possibilities endless. We work closely with our customers to create a colour code system for all of their lubricants .

Contamination is critical to even your top up equipment that's why we are proud to say we are also now able to provide dust covers for any end of the pump hoses. As well as plugs to block the breathing orifice of the hand pumps when using a breather in the system.

Wherever there is the possibility of lubricant contamination, we always have a solution for it.

We are committed to helping our customers achieve world class lubrication programs for years to come!

White Utility Lid- OS100211, \$49.00 CAD

Upfitted OS1B3211, \$152.35 CAD
